About Hillside Plastics, Inc.

Hillside Plastics, Inc. is a family-owned manufacturer and decorator of standard and custom blow-molded HDPE and polypropylene containers used in food, chemical, household, automotive, and industrial markets.

Started in 1967, Hillside was purchased a few years later by Richard and Janet Haas. Initially operating out of a rented horse barn in Sunderland, MA, Hillside moved to its newly constructed Turners Falls, MA facility in 1993, and has since enjoyed steady growth.

The company is now in the second generation of ownership by the Haas family. Peter Haas, President, began working summers at the business over thirty years ago, and advanced through a number of key positions as the company grew. Peter's sister, Kate Colby, Vice President of Finance, has also been an integral part of the company's growth, filling various roles over the last twenty years.

In 1980, Hillside developed the proprietary Sugarhill® line of Maple Syrup containers. The product's distinctive shape, attractive colors, and optional XL Coating are recognized as the standard throughout the Maple industry today.

Hillside prides itself on excellent customer service, with a sharp focus on quality, flexibility, efficiency, and continuous improvements. The company is well positioned for continued growth, meeting the specific needs of customers throughout the U.S. and Canada.

Mission Statement

Hillside Plastics, Inc. is committed to being and developing a long-standing, responsible, customer and quality motivated company.

At Hillside, we are all responsible for continuing this development by practicing leadership, promoting education, utilizing innovation, believing in teamwork, and employing capable, caring, conscientious individuals, all to serve our customers and community. (And having fun doing it.)

Custom Molding

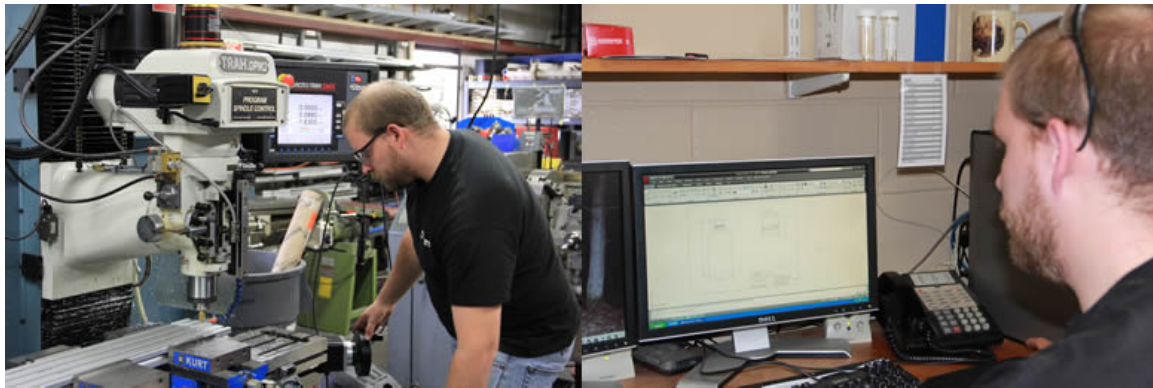

In House Container Design

Need a custom size, or specially shaped container? We are specialists at helping customers develop containers that meet their unique needs.

Hillside utilizes modern CAD design techniques, and our modular production capabilities make setting up for even small to medium sized production runs very economical. Our tooling is high quality, and we are experts at mold service and repair.

Our engineers have designed and deployed a number of automated processes throughout our facility, resulting in production efficiency, and high quality manufacturing. In fact, much of our automated machinery is actually designed and built in-house!

Custom Parts, Custom Labels! Add colorful labeling to your custom containers via our labeling or Screen Decorating capabilities. We can even deliver your Custom containers via our fleet of tractor trailers. At Hillside Plastics, we are totally committed to customer satisfaction, from concept to delivery!

Manufacturing and Shipping

MADE IN THE USA

Hillside Plastics products are manufactured in our modern 50,000 square foot (approx.) factory in Turners Falls, MA, USA. We strive for total customer satisfaction, working 24 hours per day, seven days per week.

Our plant is efficient and flexible thanks to a well-trained and caring workforce, and well placed automation to help speed up production.

Modular and Flexible

Our production processes include multiple machines, with the ability to set up for small or large runs in a modular fashion. We are highly flexible and able to respond quickly to customer schedule changes.

Hillside Plastics Shipping and Truck Fleet

We operate our own fleet of tractor trailers, allowing us to extend our focus on customer service to the customer's loading dock.

We are experts at packaging our products for shipment, and work with our customers to devise the most efficient and cost effective packaging for their needs, including cartons, bulk bags, and palletized solutions.

We maintain a large inventory of Standard Containers in our Turners Falls, MA warehouse space.

Decorating and Screening at Hillside Plastics

In addition to our blow-molded container expertise, we are expert Screen Printers at Hillside. From creative concept to printed container, our in-house Art and Decorating department can produce colorful printed graphics that will help keep your brands out front.

Our full-time graphic artist works closely with customers to create appealing artwork, and our in-house screen makers produce top quality screens that are used by our skilled printers to produce high quality multi-color images.

FDA Compliant Materials & Quality Assurance

Hillside Plastics uses one hundred percent Prime FDA approved resins. We mold primarily HDPE (high-density polyethylene), but we have experience molding other common blow-mold grade resins, such as polypropylene, and low density polyethylene. Our products are totally reclaimable and recyclable.

Our Quality Assurance processes include in-process testing by trained technicians, and a variety of in-process automated processes, including leak-testing machines. We are proud of our outstanding quality reputation, and are committed to continually improving our operations.

BPA Statement

Sugarhill® Containers are manufactured from high-density polyethylene (HDPE).

There is no bisphenol A (BPA) added to or used as an additive or raw material in the manufacture of HDPE Sugarhill® Containers.

Nor is bisphenol A (BPA) added or used as an additive or raw material in the manufacture of any materials used to manufacture HDPE Sugarhill® Containers.
