

## Ratchet-Style Caps & Ratchet Style 38-400TE Neck Finishes

Untightened Ratchet-Style Cap

Our new and improved Ratchet-Style cap works with our traditional Ratchet-Style Sugarhill® neck finish. The cap has a plastic ring that engages with the Ratchet cogs on the neck of the container. The outer ring breaks off when opening the cap to show tamper evidence. A pressure sensitive seal becomes activated when the cap is tightened down. Our Ratchet-Style caps are available in black, brown, red, and green colors, and are included in cases of Ratchet-Style containers.

### Features

- Available in black, brown, red and green
- Included in cases of Ratchet-Style containers
